  - o Method to access all bookings made in the program is accessible to the user.
- User can edit attributes for a booking if a change needs to be made
  - o Method to change individual attributes of a selected booking is made available.

#### Recommendations For Future Improvements

In the future I would like to expand this project to account for how much revenue the escape room makes overall. This would account for upkeep costs and paying the employees. This could be done through some simple calculations although it would take some time. It would also be interesting to implement JFrames into this product for the menu navigation in order to make it even more user friendly as an alternative to typing in the selections.
